

## **ALLEA holds its 17<sup>th</sup> General Assembly at the Austrian Academy of Sciences in Vienna | 18/19 April 2016**

### **President of Austria, Heinz Fischer, opens the General Assembly of ALLEA**

### **Mme de Staël prize awarded to Rémi Brague by Commissioner Johannes Hahn**

*The President of Austria, Heinz Fischer, opened the 17<sup>th</sup> ALLEA General Assembly and welcomed the participants of the scientific symposium “The Freedom of Scientific Research in the Face of Political and Societal Demands” which took place at the Austrian Academy of Sciences in Vienna on 18 April 2016. At the award ceremony in the evening, Johannes Hahn, EU Commissioner for European Neighbourhood Policy & Enlargement Negotiations, awarded the All European Academies Madame de Staël Prize for Cultural Values to French philosopher Rémi Brague.*

The 17<sup>th</sup> ALLEA General Assembly was opened by Heinz Fischer, President of Austria, and Professor Anton Zeilinger, President of the Austrian Academy of Sciences hosting the conference, and Professor Günter Stock, President of ALLEA, with a scientific symposium on *The Freedom of Scientific Research in the Face of Political and Societal Demands*.

Symposium speakers included ERC President Jean-Pierre Bourguignon, physicist Sir Peter Knight, chair of the Defence Scientific Advisory Council at the UK Ministry of Defence until 2010, as well as the former President of the Austrian Supreme Court of Justice, Professor Irmgard Griss, and former German State Minister for Culture and the Media, Professor Julian Nida-Rümelin among others. The symposium discussed the increasing interactions between the scientific, political and societal spheres, their risks and opportunities, from a scientific perspective and aimed to contribute to advancing the discourse about the autonomy of scientific research on the European level.

In the subsequent festive ceremony for the *All European Academies Madame de Staël Prize for Cultural Values* European Commissioner Johannes Hahn, former Austrian Federal Minister for Science and Research, handed over the ALLEA prize to French philosopher Rémi Brague, expressing in his festive speech: “The prize gives humanities a true European framework and helps establishing a distinct European cultural identity! I warmly congratulate today’s laureate Rémi Brague for his distinct contribution and ALLEA for the tireless effort of working on a better Europe.”

Laureate Rémi Brague (middle), EU Commissioner Johannes Hahn (right) and ALLEA President Günter Stock (left)

The laureate is professor emeritus of Arabic and medieval philosophy at the Sorbonne in Paris and holds the Romano Guardini chair of philosophy (emeritus) at the Ludwig Maximilian University in Munich. Professor Brague’s work provides an invaluable wealth of analysis on the interplay between Judaism, Christianity and Islam as they progressed through history.

“Rémi Brague uses his extensive historical, philosophical and theological expertise to study the question what makes Europe a distinct cultural entity”, stated Professor Günter Stock, ALLEA

President and chairman of the prize jury, in his speech to the ceremony’s international audience at the Austrian Academy of Sciences.

The *All European Academies Madame de Staël Prize for Cultural Values* is co-sponsored by *Stiftung Mercator* and endowed with 25,000 EUR. The prize is awarded to eminent scholars whose work represents a significant contribution to the cultural and intellectual values of Europe and to the idea of European integration.

## **ALLEA business meeting 2016: delegates from more than 40 academies across Europe elect Board for 2016-18 and welcome new members**

*The symposium and award ceremony were followed by the annual meeting of ALLEA on 19 April 2016. In the course of the meeting, again hosted by the Austrian Academy of Sciences, the ALLEA Board was (re-) elected for the term 2016-18 and the delegates of ALLEA member academies voted in favour of admitting new members to the European Federation of Academies of Sciences and Humanities.*

At the annual meeting on 19 April the member academies of ALLEA confirmed in office all re-nominated current Board members and elected three new members for the next term (2016-18). With the election, the ALLEA Board for the next two years includes members from Austria, Belgium, Bulgaria, Finland, Germany, Israel, Italy, the Netherlands, Slovakia, Switzerland, and United Kingdom.

In addition to the Board elections, the ALLEA delegates voted to welcome two new ALLEA members, the Royal Norwegian Society of Science and Letters and the Learned Society of Wales in the UK.

Delegates heard reports from the ALLEA Presidency and from chairs and representatives of ALLEA working groups. A focus of the meeting laid on ALLEA's involvement in the European Commission's Scientific Advice Mechanism (SAM) which was discussed in detail. Delegates presented and deliberated on topics currently addressed by their academies across Europe which could well be further elaborated at the European level as a contribution to the science policy advice which academies will provide via their European networks.

### **About**

All European Academies (ALLEA), the European Federation of Academies of Sciences and Humanities, was founded in 1994 and currently unites 59 Academies from more than 40 countries in the Council of Europe region. Member Academies operate as learned societies, think tanks and research performing organisations. They are self-governing communities of leading scholars and researchers across all fields of the natural sciences, the social sciences and the humanities.

ALLEA is independent from political, commercial and ideological interests and contributes to the improvement of framework conditions under which science and scholarship excel. Together with its Member Academies, ALLEA holds a unique position to address the full range of structural and policy issues facing Europe in science, research and innovation, and informs European policy and society through evidence based advice.
